

SHRUTI SUBHASH KURHADE

Aspiring Data Scientist | Machine Learning & Analytics

+91 7249779160 | kurhadeshruti1@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Detail-oriented Data Science graduate with hands-on experience in Python, SQL, machine learning, and data visualization gained through four end-to-end projects spanning predictive modeling, computer vision, and business analytics. Skilled in data cleaning, feature engineering, exploratory data analysis (EDA), and model evaluation, with proven ability to translate raw data into actionable business insights using Power BI and PostgreSQL. Strong foundation in statistics and predictive analytics, with a track record of building and deploying real-world ML applications. Eager to apply analytical and problem-solving skills to drive data-informed decisions as a Data Scientist.

EDUCATION

B.Sc. Computer Science

Graduated: 2026

Marathwada Mitramandal College of Commerce, Savitribai Phule Pune University

PROJECTS

Customer Behavior Analysis

Python, PostgreSQL, Power BI

- Cleaned and transformed raw retail transaction data using Python (Pandas, NumPy), resolving missing values and outliers to build an analysis-ready dataset.
- Engineered behavioral and purchase-pattern features, then loaded structured data into PostgreSQL for efficient querying and downstream analysis.
- Designed an interactive Power BI dashboard with drill-down visuals to surface customer purchasing trends, enabling data-driven business decisions.

Global Disaster Intelligence Platform

Python, Machine Learning, Streamlit, APIs

- Built a machine learning-powered Streamlit web application predicting risk levels for 6 disaster types (floods, cyclones, earthquakes, tornadoes, tsunamis, volcanoes).
- Integrated real-time weather data and geolocation APIs with multiple pre-trained ML models to generate location-specific risk scores.
- Combined predictive modeling with live external data sources, improving relevance and accuracy of disaster-risk alerts for end users.

Smart AI CCTV Surveillance System

Python, YOLOv8, OpenCV, Computer Vision

- Developed a real-time AI surveillance system using YOLOv8 and OpenCV to detect weapons, fights, loitering, and abandoned objects from live video feeds.
- Implemented object tracking and automated risk assessment logic to reduce manual monitoring effort and enable faster threat response.
- Built voice alerting and automatic incident evidence logging, improving reliability of intelligent security monitoring.

Currency Converter Chatbot

Python, Flask, Dialogflow, REST API

- Built an AI-powered Telegram chatbot using Dialogflow NLU and Exchange Rate API to handle real-time currency conversion via natural language queries.
- Developed Flask webhooks to connect Dialogflow intents with live exchange-rate data, ensuring accurate, up-to-date conversions.
- Deployed the backend on Render for continuous availability, enabling seamless, low-latency Telegram-based user interaction.

CERTIFICATIONS

- Data Visualization Virtual Internship — Tata (Forage)
- Data Science Professional Certificate — IBM
- Machine Learning Workshop — Certificate of Excellence, Innomatics Research Labs

TECHNICAL SKILLS

Python: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

Machine Learning: Regression, Classification, Clustering, Feature Engineering, Model Evaluation, Predictive Analytics

Deep Learning: YOLOv8, OpenCV, Computer Vision Fundamentals

Data Analysis: EDA, Data Cleaning, Hypothesis Testing, A/B Testing, Statistical Analysis

Data Visualization: Power BI, Tableau, Excel, Matplotlib, Seaborn

Databases: SQL, PostgreSQL, MySQL

Tools & Technologies: Flask, Streamlit, REST APIs, Dialogflow, Jupyter Notebook, Render

Version Control: Git, GitHub
